## SUMMARY

Senior frontend engineer with 8 years of experience building production web applications with React, TypeScript, and JavaScript. Independently delivered complex frontend work, reusable component libraries, and accessible, high-performance interfaces, with measurable improvements to conversion, reliability, and speed. Experienced in mentoring engineers and partnering with design and product teams to ship intuitive user experiences.

## EXPERIENCE

### Senior Frontend Engineer

Mar 2022 – Present

Tallgrass Labs

- Built and improved complex React product interfaces, design systems, and accessible user workflows.
- Led the migration of a 120-screen React app to a shared design system, reducing UI bugs reported per release by 40%.
- Improved frontend performance by splitting bundles and streaming server-rendered data, cutting dashboard Largest Contentful Paint from 4.1 seconds to 1.6 seconds.
- Built accessible form and table components adopted by six product teams, brought the app to WCAG 2.1 AA, and mentored four engineers.

### Frontend Engineer

Jun 2019 – Feb 2022

Copperleaf Commerce

- Delivered React and TypeScript checkout experiences and reusable components for a high-traffic commerce application.
- Rebuilt checkout for 2 million monthly shoppers, increasing conversion by 6% through a polished, efficient user experience.
- Introduced Playwright end-to-end testing and visual regression checks, halving checkout incidents.
- Shipped a Storybook component library with the design team that was adopted by three web apps.

### Software Engineer

Jul 2017 – May 2019

Bluebonnet Media

- Built React and Node.js editorial workflows that helped newsroom staff create and publish content.
- Developed editorial tools for 80 writers and migrated the publishing API to GraphQL, reducing article-page data loads by 35%.
